

BK v Keep

Had Keep, he really is a gent plenty of guidance when I wasn't sure but didn't move on until I gave a satisfactory answer.

Few general questions

Company?

What is the longest voyage you have done?

Are you staying with them?

Have you completed all elements of FD?

When did you first go to sea?

How much sea time do you require?

Started looking though TRB nav and ops workbooks.

How do you know to abandon ship?

How would you launch a Tempsc?

Where does it say the ship needs a planned maintenance system? And why do we have to comply?

What was your Companies SMS?

Difference between tidal stream and current?

Take a ship to a single anchorage from bridge perspective including planning?

Halfway through asked if he wanted Focsls actions at the same time also (as I am confident with that), he said nicely said no there is no need. This was my one attempt to lead to an area I was confident in.

Where does it say what equipment a bridge should carry and how does it varying sizes of ship.

Stopped me at radar and asked the differences?

Radar plotting sheet.....

How fast do radar transmissions travel?

Two aircraft one heading towards you, one away which one would perceive the radar transmission speed as slower?

Do we radar plot anymore?

True vectors is there an own ship vector?

Put a vl on my S/board side on the beam true vectors what is its aspect? Apparently somebody recently struggled with that.

Added a relative trail, does your ship have a trail?

Why not?

Gave the V/L to starboard a relative trail Out on its starboard side what does this indicate?

Is there a risk of collision?

Action?

How would this differ in restricted vis?

What is the size of beam?

Why so much more vertical extent?

What types of cargo do bulk carriers carry?

What is the stowage factor of cotton?

Where consumes the majority of coal and iron ore?

Where is it mined from?

What does the imdg code apply to?

How are DG categorised?

What info would you expect when receiving a container to load?

You mentioned UN numbers what is that abbreviated from?

When I said United Nations he nodded and asked how they are involved in shipping.

Then where are they based?

What is G?

What is M?

What is Lol?

How would you correct it?

Looked at my ops workbook showed me a phot of a container on a crane asked where the Center of gravity would be if it wasn't suspended? Where does gravity act when it is attached to the crane?

What is included in the planning section of APEM?

Put a starboard hand lateral mark pref channel port region B, what is it?

Where is region B?

Who maintains lights in the UK?

How is the cost covered?

Who is the money paid to?

Back to buoy .... you said it is a starboard hand lateral mark pref channel to port.... In what circumstances would you leave it to port?

And would you leave it to port at any other time?

Smarty board, pdv on my port side crossing what are your responsibilities?

You are launching and recovering aircraft what do the rules say about this?

Ok you are Ram then gave me a RAM v/l ahead, actions? Mentioned various options.

If you weren't RAM actions?

Stood up suddenly and said congratulations you have passed your exam and shook my hand.

Was in and out in 45 mins have never sweated so much ;)
